

Dear Sir or Madam,

I was very interested to read your job advertisement. With my many years of experience as an underground engineer and maintenance engineer for mining equipment, I am confident that I can support your team effectively.

During my work in Ukraine and Poland, I gained extensive knowledge in the maintenance and repair of complex equipment. In addition to my technical expertise, I also bring strong organizational skills, which I successfully applied as Deputy Director of Economics.

I would be delighted to contribute my experience to your company and continue to grow professionally. I look forward to the opportunity of a personal interview.

Sincerely,
Vladimir Plisak
